14	4.72	10.40	2.60
15	5.00	11.01	2.76
16	5.21	11.48	2.95

Note: These goals are based upon results achieved with minimal allowance for mortality. Results will be affected by feeding programs, environment, flock health and growing densities.

The Artisan thrives in a free-range or custom environment where it can express natural tendencies such as roaming and roosting.
